Mt. Tabor Neighborhood Association

Meeting Minutes by Bing Wong

April 21, 2021

Board Members Present: Nadine Fiedler, John Laursen, Brian Mitchell, Nancy Norby,

Bing Wong, Cliff Cox, Cassandra Rosenthal, Sharon Nobbe, Sam Noble

Board Members Absent: Stephanie Stewart, Barb Gamelgard

Others Present: Jim Pierce, Mo Klein, Roberta Richards, Davi Petrozzi, Lisa Kirby, David Petrozzi, Nina & John Olding

Introductions: The meeting opened with introductions led by Cliff Cox & Cassandra Rosenthal. The minutes from the March 2021 meeting approved (Bing motioned, Nadine seconded, passed,1-abstention) with the changes made from the first email draft.

Treasurer's Report: Bing Wong gave the following update: Bank Balance= \$6,145.70, deposited \$500 SEUL check for Communications Grant. Pending: Reimbursement for CT-12 filing fee (\$20), form submitted. Liabilities: iPower fees reimbursement (Kate Mitchell), on-going Zoom monthly fee from January 2020 forward (to be consolidated).

Announcements: Foster-Powell NA volunteers to serve dinners.

Public Event: In A Landscape. Date: August 17, 2021 from 4pm - 7:30pm. Contact is Lisa Shropshire (lisa@inalandscape.org). Attendees: 240. Description: In partnership with Portland Parks Foundation, IN A LANDSCAPE proposes to present a classical music concert at the summit of Mt. Tabor to commemorate the legacy of Portland Parks Superintendent Emanuel Tillman Mische and landscape architect John C. Olmsted, to encourage civic beauty, and to celebrate the Portland Parks system – our urban protector of native trees, plants and birds. The concert program will provide a serene setting for reflection by incorporating appropriate music and poetry curated by pianist Hunter Noack. All guests listen to the

performance over wireless headsets so there will not be any noise impact.

SPECIAL USE APPLICATION QUESTIONNAIRE 2021

Answer all questions completely. Do not use terms like "to be determined". If a question asks for follow up information (e.g. "if yes, please explain:") be sure to fill in the form field with as many details as possible.

(If more space is needed, please attach additional pages with your application submission)

Description of organization and its objectives (mission statement, etc.):

Founded in 2016 by classical pianist Hunter Noack, IN A LANDSCAPE: Classical Music in the Wild™ (IAL) is a 501(c)(3) non-profit outdoor concert series where America's most stunning landscapes replace the traditional concert hall. We bring a 9-foot Steinway grand piano on a flatbed trailer to National Parks, urban greenspaces, working ranches, farms, and historical sites for classical music concerts that connect people with each landscape. To meet the acoustical challenges of performing in the wild, music is transmitted to the concert-goers via wireless headphones. No longer confined to seats, they can explore the landscape, wander through secret glens, lie in sunny meadows, and roam old growth forests. IN A LANDSCAPE has presented 97 concerts in 64 venues across Oregon, Washington, Montana, and California to over 13,500 people from 35 of Oregon's 36 counties as well as from 35 states. 46% attended for free and 28% reported that IN A LANDSCAPE was their first experience with live classical music.

The mission of IN A LANDSCAPE is to celebrate both classical music and the American outdoors in experiences that are accessible to all, regardless of economic status, political affiliation, education, or age...

Portland Area Organizations Clean Air Coordination Version 39 4/8/21

Cascadia Action (CA) works for environmental justice by amplifying the voice of the people neighboring industrial air polluters in the Greater Portland Area. CA provides technical assistance and grassroots organizing support. CA is asking grassroots organizations to demonstrate that diverse groups and people throughout the region are in alignment with those most affected. It is well established that people of color and low-income people face disproportionate threats from pollution. No neighborhood should be a sacrifice zone for industry. This injustice has gone on for too long. For more information on environmental justice, a good resource is drrobertbullard.com.

Using the data from eight agencies collected over the past six years, CA has found this is generally true for Portland. Vulnerable communities also have less in the way of environmental benefits such as parks, street trees and greenspaces, as well as economic opportunity. Cascadia Action currently works to address industrial air pollution together with over 40 Portland Neighborhood Association boards along with other local organizations, coalitions, and faith organizations.

The Problem with Portland's Air Quality

When CA began six years ago, Portland was ranked as the worst city in America for respiratory distress from air pollution by the EPA national three-year assessment. Human health has never been used as a factor to regulate Portland industrial air pollution according to the Oregon Department of Environmental Quality (DEQ). Currently Multnomah ranks among the worst 1.3% of counties in the US by EPA for diesel particulate, the worst airborne carcinogen according to State of California risk assessments. This is especially a problem for people with low incomes, the young, those in ill health, and the elderly. Public awareness of this issue peaked during the Bullseye Glass scandal in 2016. Bullseye was

incinerating 6,000 pounds of lead, cadmium, arsenic, and chromium annually to make decorative glass at 722 SE 21st Avenue, located 1,000 feet from a 100-child day care. Eighty-five percent of these metals went airborne. DEQ wrote in Bullseye's 2011 Permit Review that even if 100% of these metals went airborne, Bullseye was allowed to triple production without a control device. Bullseye owned a state-of-the-art filter all along but didn't plug it in because it wasn't required by DEQ.

Now Bullseye uses their filter and has agreed to a \$6.5 million settlement with their neighbors for nuisance, trespass, and loss of property value. Before their lawsuit, neighbors fielded intense media attention resulting in Governor Kate Brown's Emergency Glass Rules. Top DEQ officials Dick Pederson and David Monro and Lynn Saxton, Director of the Oregon Health Authority, all resigned. Lynn was married to Ron Saxton, a board member for the Association of Oregon Industries, the top industry lobbying group opposing pollution regulation. Oregon allows unlimited corporate donations to politicians - this is illegal in 45 states - making the Oregon Legislature's elections the second most expensive in the nation. Oregon politicians repay these corporate donations by opposing air pollution legislation and enforcement.

Since Bullseye Glass settled with their neighbors, Governor Brown's new Cleaner Air Oregon program has vastly improved reporting. However, DEQ still doesn't use human health to regulate air pollution at this time and our State Legislature is blocking adequate regulation of diesel trucking.

Cooperating for a Solution

CA works to connect affected communities with each other through a system of "spokes" — people who serve as a two-way communication link between their group and other participants. Greg Bourget, Lead Researcher, is available to speak with your organization's board, staff, or appropriate committee. Greg can work you're your spoke to answer your organization's questions about nearby industry or truck route exposure and

health risks. CA has many resources to help you develop your strategy so nearby industrial air pollution is reasonably mitigated by the factory and truck owners.

Organizations Appoint a Spoke

For efficient city-wide cooperation, each Neighborhood Association, faith organization, or other group has a spoke — a two-way communication link. This network of spokes allows numerous groups to cooperate for mutual benefit. The spokes is invited to attend the quarterly Portland Air Summits. A spoke may bring issues other than clean air to this group and ask for participation. This role requires as little as one hour a month mostly answering emails or talking with their board. Most time-consuming communication tasks are taken care of by CA workers paid with ongoing grants or by CA volunteers.

Negotiations and Letter Endorsement

Negotiations with industry have been effective in addressing smokestack pollution in Portland. Since the Bullseye Glass scandal ten industries have mitigated at a cost of \$70K to \$20M due solely to citizen action. Letters requesting action from Neighborhood Associations are helpful during a negotiation. Currently five negotiation letters, and many in the works, focus on the most dangerous industrial smokestack polluters and unfiltered truck fleets. Endorsing these letters gives clout to Association negotiators working for voluntary mitigations from industry.

Other Ways to Participate

Help with Monitoring

We have purchased 14 bicycle-mounted GPS monitors to map analogs to diesel particulate and one bicycle-mounted GPS monitor so far for VOCs (airborne solvents such as gasoline, toluene etc.). Volunteers participate to collect or analyze neighborhood data.

Help with Research

Any group or individual willing to assist with data processing or research would be appreciated.

Host a Forum

Our lead researcher meets with community groups to answer air quality concerns and questions. We have extensive agency data and analysis for every smokestack and truck route in the tri-county area.

Identify Industrial Air Pollution

Cascadia Action can assist you in collecting and interpreting government data for the area you are focused on or for a specific industry your group is concerned about.

Climate Concerns and Clean Air

Climate change is an overarching issue that many Portland area groups are concerned about. Join with neighborhood groups to oppose the Zenith tar sands rail terminal in the Linnton neighborhood of Northwest Portland. Tar sands must be left in the ground to slow climate disruption. The extraction, transport, processing, and burning of tar sands and their products harm communities' air, land, water, and the climate.

Who to contact

Contact Greg Bourget to schedule a presentation or discussion with your organization.

gregbourget@hotmail.com

Please do not share or forward the following information. This is provided only for participating organizations' decision makers and their spokes.

Organizing Strategy

Cascadia Action is working to assist stakeholders to negotiate with the Portland industries posing the greatest risk to human health. CA defines a "stakeholder" as an organization or group of neighbors most primarily affected by an industrial polluter. So far this has been limited to the boards of Portland Neighborhood Associations, 38 of which have appointed one or more spokes to this project. We reach out to diverse local groups including faith organizations, civic and social justice groups, and environmental protection groups to support this effort. CA is contacting Washington County Citizen Participation Organizations and other neighborhood organizations to act as stakeholders.

CA advocates not forming a "coalition," defined as "the joining together of different groups for a particular purpose, usually for a limited time, where one spokesperson speaks on behalf of all participants." Instead, CA suggests forming a "cooperation" defined as "groups acting together through board decisions on a case by case basis."

This cooperation involves the sharing of information, ideas, and feelings among participating organizations so that they may coordinate activities and fulfill a common goal.

CA thinks the goal is to motivate neighboring industry to mitigation dangerous pollution so that a further escalation of citizen action is not required. CA thinks that the negotiator for such a deal should be the stakeholder(s) nearest to the industry. The negotiating organization is supported by the rest of the cooperating organizations via endorsements, material assistance, labor assistance, emails to members, newsletter articles, and social media posts as requested. Organizations acting in a support role do not participate in the negotiation or publicize

their involvement unless specifically authorized by the stakeholder.

If escalation becomes necessary, such as public protest, legal action, or media involvement, this can be expensive and time consuming for the affected group. Sharing this burden among many organizations can make such an effort for attainable.

CA advocates the grassroots strategy above to stop co-option and infighting. Infighting can be defined as disrespectful behavior between participating groups. Appropriate expression of disagreement and conflict resolution is not infighting. For more information on stopping or preventing infighting see:

rnef.org/literature/StoppingInfighting.pdf

Co-option is when an individual or organization loses control of the use of their name and decision making process. For this reason CA has a policy to not speak or write about individual group participants without their express consent on a case-by-case basis. It is expected that all participants also follow this expectation. The strategy explained above places total control of a negotiation or campaign with the stakeholder board. For more about preventing co-option:

rnef.org/literature/StoppingCo-option.pdf

Total: 77 participating organizations

Cascadia Action information requests to eight air pollution agencies data are portrayed with GIS and Google mapping, statistical analysis, computer programming, web design, and cited research reports, available at: portlandcleanair.org/

Washington County information is here: hillsboroairwater.org/

Reports on Portland industrial smokestacks, diesel particulate, woodsmoke, and demolitions is here: portlandcleanair.org/files/pcapubs.html

All agency data collected so far is here: portlandcleanair.org/files/pcadata.html

Real time wind direction from sensors: https://mesonet.smpc.tv/45.536974885126554,-122.67257775671169

Total contact lists: 64,000 people verified so far

CA owns 14 GPS-enabled, bike mounted PM1 PocketLab Air monitors that collect geotagged, timestamped data on airborne particulate: thepocketlab.com/store/pocketlab-air

CA owns a \$70 K OP-FTIR spectrometer for airborne VOC detection and quantification. More on the FTIR here:

https://clu-in.org/programs/21m2/openpath/op-ftir/ and here:

http://cerexms.com/pdfs/Cerex_AirSentry_FTIR_Br ochure.pdf

A required instrument for diesel particulate detection is a Grimm electrometer. This is a \$43 K device of which Cascadia Action is requesting funding for this instrument. More info here: grimm-aerosol.com/products-en/indoor-air-quality/the-wide-range-hybrid/1371/

Nadine, within our guidelines for noise and duration.

Bing: MTNA Board member elections will be held during the May meeting on May 19, 2021. Need officers, secretary for State recording for non-profit and legal uses. One new person nominated after the announcement.

Sam: Foster-Powell NA invitation for volunteers from other neighborhood associations to provide dinners to shelters in the neighborhood. If interested email contact Volunteer@FosterPowell.com They reimburse for costs of groceries.

Cascadia Action Clean Air liaison- Mo Klein volunteered to be MTNA coordinator with the group to report to MTNA any actions or letters for a vote to sign onto. The goal of the group is to reduce emissions in the city at the neighborhood level and support actions in other neighborhoods. This neighborhood does not have major industrial polluters. John mentioned Portland Nursery and Portland Parks Central Maintenance Yard. Look to support other neighborhoods where pollution affects thiers and other neighborhoods. Cascadia Action Clean Air website www.portlandcleanair.org

Southeast Uplift Report: Sam Noble -Commission Hardesty joined their meeting who is over OCCL (Office of Community & Civic Life) and wants to look at metrics before any change to the bureau will occur, Code 3.96 revision on hold. John L wanted to know if the investigative report into the bureau's leadership with staff was brought up? Sam reported no, will ask around. Sam reported that at another meeting, Sam Adams (staff to Mayor Wheeler) wants to bring neighborhood clean up in some form as furniture dumping has been an issue. John reports SEUL staff cut communications funding to neighborhood associations. Sam said the City contract with SEUL extended 1 year. Jim Pierce question to Sam about SEUL board involvement with staffing decisions and Federal 501c3 rules.

Land Use: Stephanie Stewart -unable to attend. Sharon Nobbe attended SEUL Land Use meeting on Monday. Tiny houses on wheels (THOW) and other housing was a topic of discussion to get more housing in communities, City Council action required.

Friends of Mt Tabor Park: Bing Wong gave the following update: At the last meeting the officers were elected, Hannah Dondy-Kaplan-Chair, Marco Petri-Vice Chair, Steve Law-Secretary, Rachel White-reelected Treasurer. A Saturday Nature Series was started. Bing took doggy bags provided by FMTP to dog off-leash area. Nancy N reported she's been away and no longer has a dog, not been there for some time. The Visitor Center is open with COVID restrictions. Annual Picnic is tentatively scheduled for September 13.

Sharron wants board members to give their perspective on their experiences as board members incase those attending may be interested in becoming board members next month. Growth and depth is a goal of hers. Some current members thinks people who want to be on the board not be "one issue".

The meeting adjourned at the completion of our published agenda.

The next meeting will be Wednesday, May 19, 2021 at 7 PM via Zoom.

For more information, please visit www.mttaborpdx.org.
